Re: Sampling Sapawe Gold Mine Property

To whom it may concern,

Please accept this assessment work report for work done on claims 4222972 and 4214541, which are adjacent and contiguous to the property. The claims were staked in July 2008 and November 2008 respectively. A description of the property and an explanation of the assessment work and costs are included in the text below.

The two claims mentioned above, are part of the property that consists of eight contiguous mining claims covering a nominal area of 1,056 ha, held 100% by Pierre Gagne, subject to certain royalties (table 1).

Un-Patented Claims					
Township	Claim#	Due Date	# Units	Area (Ha)	Due Work/ Year
Sabawi	4222971	10-Jul-10	15	240	\$6,000.00
Hutchinson	4222972	10-Jul-10	12	192	\$4,800.00
Sabawi	4222973	10-Jul-10	16	256	\$6,400.00
Hutchinson	4222974	10-Jul-10	12	192	\$4,800.00
Hutchinson	4214539	21-Nov-10	2	32	\$800.00
Hutchinson	4214540	14-Nov-10	2	32	\$800.00
Hutchinson	4214541	21-Nov-10	2	32	\$800.00
Hutchinson	4214542	21-Nov-10	5	80	\$2,000.00
Total:			66	1056	\$26,400.00

table 1

The Sapawe Gold Mine Property is located in the Sabawi Lake Area and Hutchinson Township, Thunder Bay Mining Division, North Western Ontario, Canada (figure 1). The property is located approximately 30 km east of the town of Atikokan and 200 km west of the city of Thunder Bay. The old Sapawe Gold Mine shaft is centered on the UTM system Nad83, Zone 15 coordinates 618427E and 5405247N, on the National Topographic System (“NTS”) map sheet 52B/14SW.

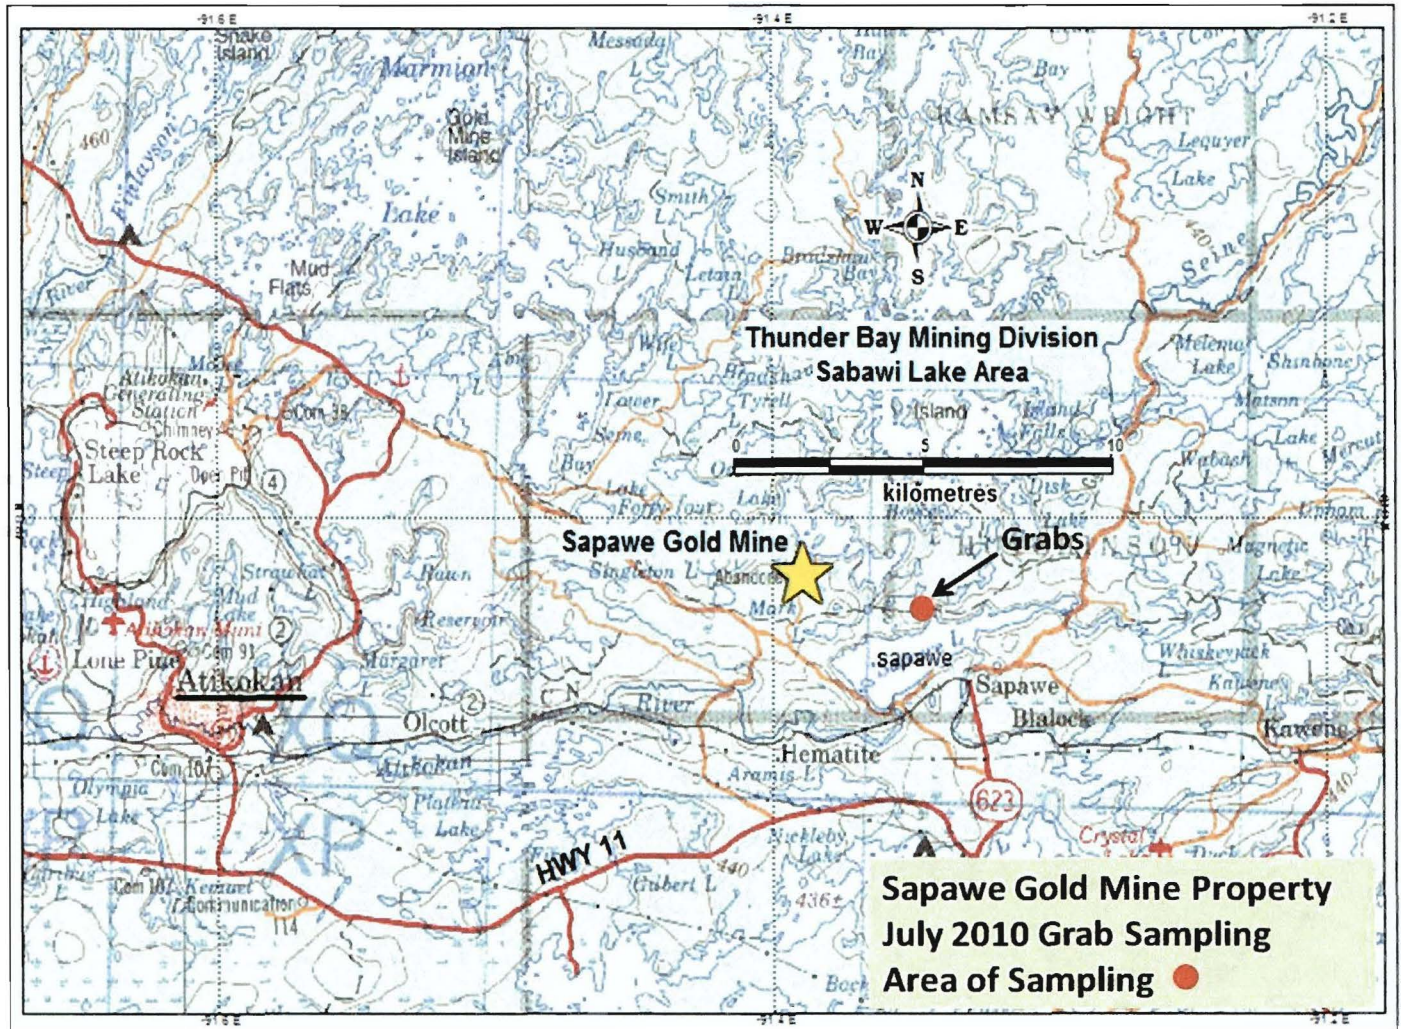

figure 1

The property is accessed by travelling north, 9 km from the intersection of Highway 11 (Trans Canada) and Highway 623, then proceeding northwest 11 km through the Sapawe Sawmill - on the old gravel mine road. All resources such as water, supplies, personnel and hydro are available nearby.

The topography surrounding the old mine, covers an area of steep hills with high exposure of outcrops. The dominant vegetation consists of spruce, tamarack, and alder swamps. Water is abundant from the nearby lakes and streams and would easily supply a mining operation.

In June 2010, Pierre Gagne contracted Geo Data Solutions to do a Heliborne High Resolution Aeromagnetic and Electromagnetic Survey in the area. The heliborne survey indicated many anomalies on the property, of which, seven were chosen for sampling. Pierre Gagne contracted Pierre Gagne Contracting Ltd. to obtain samples from the seven locations found on claims 4214541 and 4222972. The sampling work was done between October 1, 2010 and October 14, 2010.

Total credits to be considered for this report: \$19,854.00. Details of the breakdown of costs, involved for this assessment work, are included in the attached report from Accurassay Laboratories of Thunder Bay, Ontario, and in the invoice from Pierre Gagne Contracting Ltd.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "Paul Malench". The signature is fluid and cursive, with a large initial "P" and a long, sweeping underline.

Re: Sampling Sapawe Gold Mine Property

Lucille Jerome,

In reference to your letter dated December 21, 2010 concerning Submission Number: 2.46627 and Transaction Number(s): W1040.02592, please accept this addendum to assessment work report for work done on claims 4222972 and 4214541.

The additional information that was requested by MNDM is enclosed in two paper copies and two disc copies.

The two claims mentioned above, are part of the property that consists of eight contiguous mining claims covering a nominal area of 1,056 ha, held 100% by Pierre Gagne, subject to certain royalties (table 1).

Un-Patented Claims
