In July, 1980 one vertical hole was sunk through 16.5 feet of tailings on claim L - 491835, Teck Township.

A split tube was driven down two feet at a time by a hand operated hammer. Each two foot sample was assayed for gold and silver. Carl Forbes of 11 Second Street, Kirkland Lake and Ron Crichton of 67-A Third Street, Kirkland Lake provided equipment and labour.

All the above claims from a contiguous group optioned from Emil Chorzepa by Lampe Resource Co. Ltd.

In November, 1979 a trenching program was conducted on parts of three claims in Teck Township; [L - 491681, L - 491832, L - 491680]. Ten samples of vein material were taken from the trenches and assayed for gold.

In December, 1979, one diamond drill hole was put down to intersect the vein west of the shaft on claim L - 491832. Six samples of mineralized core were assayed for gold. Location and description of samples are as follows:
